Claim Rejections - 35 USC § 103

Page 3

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

Claims 8, 17 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Gluck et al. in view of the examiners taking official notice.

As per claims 8, 17 and 26, the examiner takes official notice that it is well known in the

art to employ an e-mail body scanner. It would have been obvious to anyone having an ordinary

level of skill in the art at the time the invention was made to have included this feature in the

invention of Gluck et al. since it has been known for a long time that e-mail can contain a virus

detrimental to many systems.
